

# Capability Statement

## **Company Overview**

We provide integrated abrasive blasting, industrial protective coating and scaffolding services to the oil & gas, energy, infrastructure, and industrial sectors across Chinchilla, the Surat Basin, and surrounding regional Queensland. Our team delivers safe, compliant, and high-quality outcomes in operational, construction, and maintenance environments.

With a strong understanding of regional conditions and remote work requirements, we support shutdowns, new builds, remediation works, and ongoing asset maintenance.

## **Core Services**

### **Abrasive Blasting:**

- Grit, garnet and specialty media blasting
- Surface preparation to AS 1627 series
- Preparation of structural steel, pipework, and plant
- Containment and environmental controls
- Coating removal and corrosion remediation

### **Industrial Painting & Protective Coatings:**

- Application of protective and anti-corrosive coatings
- Coating Systems of AS/NZS 2312, AS 4041 and client specifications
- Epoxy, polyurethane, zinc-rich, and specialty coatings
- New construction and maintenance repainting
- Quality assurance documentation (DFT readings, ITPs, coating reports)

### **Scaffolding Services:**

- Design, supply, erection, modification and dismantle
- Fixed, mobile, modular, and access scaffolding
- Scaffolds for maintenance, shutdowns, and construction works
- Scaffold inspections and handover certification
- Compliance with WHS Regulations, AS/NZS 1576, and AS/NZS 4576
- High-risk work licensed scaffolders

### **Industrial Serviced**

- Oil & Gas (CSG and conventional)
- Energy & Power Generation
- Infrastructure & Utilities
- Industrial Facilities

## Capability Statement

- Mining & Resources
- Agriculture & Processing Facilities

### **Safety & Compliance**

Safety is central to all operations. We maintain systems and procedures aligned with Australian legislation and client WHS requirements.

- WHS Management System aligned with WHS Act & Regulations (QLD)
- Job Safety Analysis (JSA) and Safe Work Method Statements (SWMS)
- Licensed and competent workforce
- Plant, equipment, and scaffold inspections
- Environmental and dust control measures
- Drug & alcohol compliance (where required)

### **Quality Assurance**

- Inspection and Test Plans (ITPs)
- Surface profile and cleanliness verification
- Dry Film Thickness (DFT) and coating inspection records
- Traceable documentation and handover packages
- Works completed to Australian Standards and client specifications

### **Regional Capability**

- Based in and servicing Chinchilla and surrounding areas
- Rapid mobilisation to regional and remote sites
- Experience working within live facilities and operational plants
- Reliable support for shutdowns and time-critical works.

### **Why Choose Us**

- Integrated blasting, painting, and scaffolding services
- Strong regional presence and responsiveness
- Compliance-driven, safety-focused delivery
- Experienced workforce with industry knowledge
- Clear communication and dependable scheduling
